Roadmap to reduce your plastic footprint

Implement activities

...to eliminate the leakage and increase circularity of products and materials.

5 Time for plastic crediting

Now you will look at insetting/offsetting any use of fossil-based virgin plastics or leakage that's not yet mitigated (which goes beyond the value chain). This is where plastic crediting comes into the picture.

Define commitments

...and in that, understanding what you need to do to stay aligned with the common vision for eliminating the

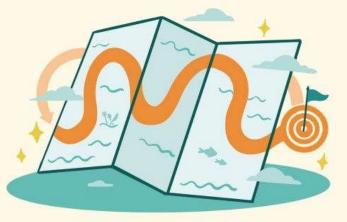

2 Join us

Then, as you have your baseline, apply to join the Ocean Alliance.

Assess your total plastic footprint

Map up what plastics you use and where. This is your baseline, which you'll use for monitoring your progress.

ROADMAP

6 Evaluate and learn

When you've done your insetting/offsetting it's time to evaluate and

Gather insights and report

Gathering your key insights makes you ready to also report your performance.

B Keep it up!

And then lastly, iterate as needed.
